TUFPORT™

**FIST** Fiberglass Insulated  
Seedling Transport

## Better Trees, Lower Costs

- BUILT WITH FIBERMOLD™ TECHNOLOGY
- UNPRECEDENTED RESALE VALUE
- COMPOSITE LAMINATE CONSTRUCTION
- REINFORCED STRESS-CRITICAL AREAS
- UNIVERSAL DESIGN FITS ANY TRUCK
- OVER 40 YEARS OF PROVEN PERFORMANCE

For over 40 years, Fibermold and Horizon Fiberglass have been leading the way with the highest quality commercial slide-in units. As of April 2007, Fibermold and Horizon will officially be known as Tufport™. The new brand is a reflection of our commitment to designing and manufacturing best-in-class, cost-effective, industrial grade slide-in units that service markets throughout the world.

To further our commitment to innovation, we will be introducing a completely redesigned product line tougher and more durable, with an esthetic that complements any modern pick-up. One thing that has not changed is our commitment to excellence in our products and service. We are still family owned and operated and plan to stay that way.

**You own a Tufport™. You own the Best.**

CHANGES  
ARE ON THE HORIZON!

### The FIST (Fiberglass Insulated Seedling Transport) sets the standard in seedling transport.

By maintaining lower temperatures, increasing seedling respiration, and reducing handling, the FIST reduces seedling stress and increases seedling survival. The result: A healthy, vigorous plantation.

The large capacity of 20,000 boxed seedlings – a day's work for your planting crew – means fewer field caches. Reduced handling and easy-access adjustable racks reduce labor, back injuries, and potential workers compensation claims.

Long lasting and durable, the FIST's industrial composite sandwich construction is surprisingly light at only 800 lbs, and provides insulation on all sides, roof, and the floor. Rubber floor mats protect from slips/falls and spiked boots. Easily mounted on any full size pickup, the FIST unit is versatile. It is trailerable, and can be fitted for helicopter lifts to remote areas. And, when it's not carrying seedlings, the FIST easily transports camp equipment and supplies.

### Major Benefits:

- Better Seedling Survival
- Reduced Box Handling
- Large Capacity
- Long lasting
- Fits Any Full-Size Pick-up
- Versatile

FIST - Fiberglass Insulated Seedling Transport Tree Planter

## Fiberglass Unsulated Seedling Transport

Exterior			Interior			Door		Weight
L.	W.	H.	L.	W.	H.	W.	H.	800 lbs. (364 Kg.)
103"	79"	79"	99"	75"	76"	48"	69"	

## BUILT WITH FIBERMOLD™ TECHNOLOGY

We have produced 15,000 units over the past 40 years. Each and every Tufport™ is manufactured to meet the industry's toughest engineering standards with superior strength and endurance being the primary goal. Our "raise the bar" approach to fit and finish is exemplified by the fact that we use a much higher quality mold coating than our competitors on comparable components. The finish not only provides a "Mega Yacht" level of quality and performance—protecting our units from fading, osmosis, and overall fatigue—but it is also green friendly. Unlike manufacturers with mass produced truck cap processes that exclusively use fiberglass, Tufport™ incorporates composite technology into every unit built. Using a variety of advanced materials in stress-critical areas—mounting rails, sidewalls and corners—ensures our units can endure the punishment inflicted by even the most intense daily routines. All of our units are finished using industrial grade stainless steel fasteners and hardware on the doors and windows.

You can trust your Tufport™ to withstand the pounding and jarring of even the toughest daily grinds, and provide unrivaled value today and for years to come. Our commitment to building the world's most durable, longest lasting slide-in units means that every Tufport™ we make is designed to outlive any pick-up truck on the market today. Thanks to their universal fit, you can quickly transfer your Tufport™ to a new truck at any time and be back on the job within minutes.

## FEATURES

- Composite sandwich core construction, using R12 high density foam.
- Galvanized steel rear door frame, with stainless steel piano hinges on doors.
- Bolted aluminum 2"x2" angle shelf supports.
- Integrated wall and roof reinforcing with kiln dried spruce.
- Lockable security with galvanized steel door latch.
- Flettner Roof Vent, wind propelled air exhaust, 41 cu/ft per minute per 10 mph wind.
- White gelcoat color to reflect heat.
- Slide-in design fits any full size pick-up truck.
- Safety non-skid 3/8" rubber floor mat.
- Easy to clean interior.
- Helicopter lift option for remote use.
- One year warranty

CHANGES ARE ON THE HORIZON™

## Insulated transport for your fresh or frozen goods has never been so easy.

The KOOL-HAUL slide-in unit installs easily into any full-size pickup truck and removes the need for a dedicated transport vehicle. Made from industrial grade sandwich-core composite, the durable KOOL-HAUL unit is surprising light at only 800 lbs. Thick R12 insulation in all four sides, roof and the floor keeps your product cool. Add the optional refrigeration/reefer units and the KOOL-HAUL becomes a mobile fridge or freezer. The sanitary white gelcoat interior walls are easy to clean. Two full-size rear doors make loading easy. You'll be surprised at how much will fit into the 275 cubic foot interior.

*Keep cool while you're hauling the KOOL-HAUL way.*

## Major Benefits:

- Insulated to Protect Valuable Cargo
- Fits Any Full-Size Pick-up
- Large Capacity
- Durable
- Versatile
